Question 1 · Getting Started with Oracle APEX on the Oracle Autonomous Database

✖ Answered Incorrectly

Which two are true about Oracle APEX?

- A. Requires no additional client software. A web browser is the app development IDE. (Correct Answer)
- B. Is declarative. It requires no code generation. (Correct – Your Answer)
- C. Requires developers to be proficient in Java, Python and other programming languages. (Your Answer)
- D. Performs the data processing in a middle-tier server

Explanation

Correct

Question 2 · Getting Started with Oracle APEX on the Oracle Autonomous Database

✔ Answered Correctly

<p>You can create an APEX workspace and build APEX apps on which of the following platforms?</p>

- A. Oracle Autonomous Cloud
- B. Oracle XE
- C. Amazon RDS
- D. Microsoft Azure
- E. All of the above (Correct – Your Answer)

Explanation

<p>Correct</p>

Question 3 · Getting Started with Oracle APEX on the Oracle Autonomous Database

✅ Answered Correctly

Which three are the main components of APEX workspace homepage?

- A. SQL Workshop (Correct – Your Answer)
- B. App Builder (Correct – Your Answer)
- C. Gallery (Correct – Your Answer)
- D. RESTful Services

Explanation

Correct

Question 4 · Getting Started with Oracle APEX on the Oracle Autonomous Database

✅ Answered Correctly

Which two among the following are TRUE about Low Code Apps?

- A. Provide Rich Functionality with Less Code (Correct – Your Answer)
- B. Expensive
- C. Scalable (Correct – Your Answer)
- D. Not Mobile Friendly

Explanation

Correct

Using SQL Workshop

Question 1 · Using SQL Workshop

✖ Answered Incorrectly

Which component in SQL Workshop allows you to build queries graphically without manual SQL coding?

A. Quick SQL

B. SQL commands (Your Answer)

C. Query Builder (Correct Answer)

D. Data Workshop

Explanation

Correct!

Question 2 · Using SQL Workshop

✔ Answered Correctly

From SQL Workshop, you can perform which two of the following actions?

A. Create an APEX user

B. Run SQL commands and scripts (Correct – Your Answer)

C. Create and view database objects (Correct – Your Answer)

D. Delete database

Explanation

Correct

Question 3 · Using SQL Workshop

❌ Answered Incorrectly

What three are the result of the following QuickSQL shorthand notation do?

```
<br><pre>departments /insert 4
```

```
<br> name /nn
```

```
<br> location
```

```
<br> country</pre>
```

- A. Create the departments table with 4 columns (Correct Answer)
- B. Creates an id column as a primary key (Correct – Your Answer)
- C. Create the departments table with 3 columns (Your Answer)
- D. Inserts 4 rows of random data into the departments table (Correct – Your Answer)

Explanation

Correct!

Question 4 · Using SQL Workshop

✅ Answered Correctly

Using Data Workshop, you can perform which three tasks:

- A. Delete data from the database
- B. Load vast amount of data into the database (Correct – Your Answer)
- C. Load data using various file formats such as XLSX, CSV, XML, and JSON (Correct – Your Answer)
- D. Export vast amount of data from the database into a file (Correct – Your Answer)

Question 1 · Creating a Database Application

❌ Answered Incorrectly

Using the App Builder component, you can perform which three tasks?

- A. Install a sample App (Correct – Your Answer)
- B. Create a new App (Correct Answer)
- C. Edit pages in the page designer (Correct – Your Answer)
- D. Run SQL scripts and commands (Your Answer)

Explanation

Correct

Question 2 · Creating a Database Application

✅ Answered Correctly

Choose the two correct statements about PWA.

- A. Provides a customizable offline page when users are offline and cannot request the network. (Correct – Your Answer)
- B. Enables users to install the application on devices (Correct – Your Answer)
- C. To download the app as PWA, one must visit the App Store
- D. An existing APEX app cannot be made a PWA

Explanation

Correct

Question 3 · Creating a Database Application

❌ Answered Incorrectly

Which three of the following options are TRUE about a page in an APEX application?

- A. An APEX application can have only one page. (Your Answer)
- B. To view the rendered version of the page, you run or submit it to the Oracle APEX engine. (Correct – Your Answer)
- C. A page can contain buttons, page items and regions. (Correct Answer)
- D. A page can be viewed and edited in the Page Designer. (Correct – Your Answer)

Explanation

Correct

Question 4 · Creating a Database Application

❌ Answered Incorrectly

Choose the two statements that are TRUE about the Universal Theme in APEX.

- A. The developers must have extensive knowledge about Javascript, CSS and HTML in order to use the Universal Theme. (Your Answer)
- B. Responsive UI (Correct – Your Answer)
- C. Easy customization (Correct Answer)
- D. Not designed to work on tablets

Explanation

Correct

Question 5 · Creating a Database Application

❌ Answered Incorrectly

Choose the three correct options in the given friendly URL syntax: <https://example.com:5500/ords/r/mycompany/hr-app/update-employees?session=13766599855150>

- A. update-employees is the PL/SQL procedure to update the employee details. (Your Answer)
- B. mycompany is the path-prefix which is by default the workspace name (Correct – Your Answer)
- C. 13766599855150 is the session ID. A new ID is generated for each session. (Correct Answer)
- D. hr-app is the application alias. (Correct – Your Answer)

❌ Answered Incorrectly

Choose the three different ways in which you can add a checkbox to a page.

- A. Add a checkbox from the Property Editor (Your Answer)
- B. Drag and drop the checkbox item into the Layout pane (Correct – Your Answer)
- C. Right click Body in the Rendering Tree and add a New Page Item as Checkbox Type. (Correct – Your Answer)
- D. Use the context sensitive menu in the Gallery pane. (Correct Answer)

Explanation

Correct

Question 2 · Working with Pages and Regions

✅ Answered Correctly

<p>Choose from the following the different kinds of page components you can create in APEX.</p>
<p>

- A. Interactive Grid
- B. Smart Filters
- C. Search Page
- D. Faceted Search
- E. All of them (Correct – Your Answer)

Explanation

<p>Correct</p>

Question 3 · Working with Pages and Regions

✅ Answered Correctly

When a button is pressed, an overlay window is positioned within the viewport. What kind of page mode is it?

- A. Normal Page
- B. Modal Dialog (Correct – Your Answer)**
- C. Help Page
- D. Non-Modal Dialog

Explanation

Correct

Question 4 · Working with Pages and Regions

❌ Answered Incorrectly

The Page Designer Toolbar allows you to perform which two of the following actions?

- A. Delete the application (Your Answer)**
- B. Navigate to Shared Components (Correct – Your Answer)**
- C. Export the application
- D. Create a new page (Correct Answer)**

I want to hide a few columns in my interactive report. To do so, which option should I choose from the Actions menu?

A. Format

B. Data (Your Answer)

C. Columns (Correct Answer)

D. Filter

Explanation

Correct

Question 2 · Developing Reports

✅ Answered Correctly

Which two of the following capabilities are TRUE for both Interactive Report and Interactive Grid?

A. End user can rearrange the report interactively using the mouse.

B. End user can save the report (Correct – Your Answer)

C. End user can customize how and what data is displayed. (Correct – Your Answer)

D. End user can add, modify, and refresh data directly on the report.

Explanation

Correct

Question 3 · Developing Reports

❌ Answered Incorrectly

In a Classic Report, an end user can perform which one of the following actions?

- A. Rearrange the columns in the report.
- B. Filter values of a column in the report. (Your Answer)
- C. Create Control Breaks in the report.
- D. Sort the columns of the report. (Correct Answer)

Explanation

Correct

Question 4 · Developing Reports

❌ Answered Incorrectly

You can create a report in which of the three following methods?

- A. Create a report as a new page in an application (Correct – Your Answer)
- B. Create a report from Object Browser (Your Answer)
- C. Create a report region on a page in an application (Correct – Your Answer)
- D. Create a report when you create a new database application (Correct Answer)

Explanation

Correct

Question 5 · Developing Reports

❌ Answered Incorrectly

Which two types of pages behave similarly in functionality?

- A. Smart Filter (Correct – Your Answer)
- B. Cards (Your Answer)
- C. Faceted Search (Correct Answer)
- D. Map

Question 1 · Managing and Customising Interactive Reports

✖ Answered Incorrectly

Choose the two options provided in a Column Heading menu of an Interactive Report.

- A. Group By (Your Answer)
- B. Delete (Your Answer)
- C. Control Break (Correct Answer)
- D. Hide (Correct Answer)

Explanation

Correct

Question 2 · Managing and Customising Interactive Reports

✖ Answered Incorrectly

To highlight certain rows in the interactive report based on a condition, you must:

- A. Edit the rows in the report and select a color (Your Answer)
- B. Rows cannot be highlighted in an Interactive report
- C. Provide a conditional SQL query
- D. Choose a condition in Format > Highlight (Correct Answer)

Explanation

Correct

Question 3 · Managing and Customising Interactive Reports

❌ Answered Incorrectly

Choose the three types of aggregations you can apply on a column.

- A. Count (Correct Answer)
- B. Sum (Correct – Your Answer)
- C. Average (Correct – Your Answer)
- D. Standard Deviation (Your Answer)

Explanation

Correct

Question 4 · Managing and Customising Interactive Reports

❌ Answered Incorrectly

Which two of the following types can an end user save the customized Interactive report as?

- A. A private report (Correct – Your Answer)
- B. Cannot save the report (Your Answer)
- C. A Public report (Correct Answer)
- D. Default report

Explanation

Correct

Question 5 · Managing and Customising Interactive Reports

❌ Answered Incorrectly

Choose the two statements that are TRUE about an Interactive Report. As a developer:

- A. You can customize the pagination (Correct – Your Answer)
- B. You can modify the data in the report after running the app (Your Answer)
- C. You cannot modify the report source query
- D. You can customize the Actions menu to include or exclude certain options. (Correct Answer)

Question 1 · Enhancing your application using Computations, Processes and Validations

✖ Answered Incorrectly

A Page Computation can be created from which two of the following tabs?

- A. Dynamic Actions (Your Answer)
- B. Shared Components (Your Answer)
- C. Rendering Tree (Correct Answer)
- D. Processing (Correct Answer)

Explanation

Correct

Question 2 · Enhancing your application using Computations, Processes and Validations

✖ Answered Incorrectly

Consider a customers report. A customer name is clicked in the report to display the Customer Details form. When the items in the form dialog are updated and the user clicks Apply Changes, the page process is executed and the items from the page are used to update and commit the underlying table in the Oracle Database. What are the two types of events that occurred in this scenario?

- A. Page Rendering (Correct – Your Answer)
- B. Page Validation (Your Answer)
- C. Page Refresh
- D. Page Processing (Correct Answer)

Explanation

Correct

Question 3 · Enhancing your application using Computations, Processes and Validations

❌ Answered Incorrectly

When you run an application, the APEX engine relies on which two processes?

- A. Validate Page (Your Answer)
- B. Run Page (Your Answer)
- C. Accept page (Correct Answer)
- D. Show Page (Correct Answer)

Explanation

Correct

Question 4 · Enhancing your application using Computations, Processes and Validations

❌ Answered Incorrectly

When you click a Customer Name in the Customers report, the Customer Details form dialog page is displayed. What are the events that occur in this scenario?

- A. Page Rendering (Correct Answer)
- B. Page rendering and processing (Your Answer)
- C. Page Processing
- D. Page compilation

Explanation

Correct

Creating and Using Dynamic Actions

4 Questions

Total Questions	Correct	Incorrect	Score

Question 1 · Creating and Using Dynamic Actions

✖ Answered Incorrectly

Which two statements are TRUE about Dynamic Actions?

- A. It is not possible to debug Dynamic Actions from the Developer Toolbar (Your Answer)
- B. More dynamic actions you add to a page, the greater your overall page size. (Correct – Your Answer)
- C. Dynamic actions provide a way to define complex client-side behaviour declaratively without the need for JavaScript. (Correct Answer)
- D. Dynamic Actions require complex client side Javascript code.

Explanation

Correct

Question 2 · Creating and Using Dynamic Actions

✖ Answered Incorrectly

In an Employee form, the 'Commission' and 'Hire Date' fields are enabled only if the Job is 'Salesman'. This can be achieved by which feature of APEX?

- A. PL/SQL procedure
- B. Conditional SQL (Your Answer)
- C. Processing
- D. Dynamic Actions (Correct Answer)

Explanation

Correct

Question 3 · Creating and Using Dynamic Actions

❌ Answered Incorrectly

To create a Dynamic Action, you need to specify which three of the following options?

- A. Why the action is performed (Your Answer)
- B. When the action occurs (Correct – Your Answer)
- C. What elements are affected by the action (Correct – Your Answer)
- D. What action or actions are performed (Correct Answer)

Explanation

Correct

Question 4 · Creating and Using Dynamic Actions

❌ Answered Incorrectly

When you create a Dynamic Action, you specify the event that causes the dynamic action to fire. Choose the categories these events are classified into.

- A. Component Events
- B. Browser Events (Your Answer)
- C. Custom Events
- D. All of them (Correct Answer)
- E. Framework Events

Question 1 · Migrating Application Development Between Environments

❌ Answered Incorrectly

Select the two advantages of using One-click Remote Deployment.

- A. You need to access your production environment to import the app directly.
- B. Directly deploy your app definition along with the objects from the source system to the target system (Correct – Your Answer)
- C. Simplify the process of deploying an application (Correct Answer)
- D. Deploy the app, and explicitly install the supporting objects in one-click.

Explanation

Correct

Question 2 · Migrating Application Development Between Environments

❌ Answered Incorrectly

What are the two primary ways to move database objects and data from one environment to another, for a single application?

- A. Oracle SQL Developer (Correct – Your Answer)
- B. SQL Workshop (Correct Answer)
- C. App Builder
- D. Page Designer

Explanation

Correct

Question 3 · Migrating Application Development Between Environments

❌ Answered Incorrectly

What three components must be considered while migrating an APEX app between environments?

A. Move the application definition and all associated files (Correct – Your Answer)

B. Move the database objects (Correct Answer)

C. Move the sessions data

D. Move the images (Correct Answer)

Explanation

Correct

Question 4 · Migrating Application Development Between Environments

✅ Answered Correctly

While migrating apps, once the database objects are created in the target environment, you can load the data using which of the components?

A. Data Generator

B. Quick SQL

C. Data Workshop (Correct – Your Answer)

D. App Builder
